

ISURU EDIRISINGHE

Junior DevOps / Cloud Engineer

Colombo, Sri Lanka | **Phone:** (+94) 705600250 | **Email:** isuruindrajith680@gmail.com | **LinkedIn:** www.linkedin.com/in/isuru-edirisinghe | **Web:** <https://my-portfolio.vercel.app> | **GitHub:** github.com/IsuruIndrajith

PROFESSIONAL SUMMARY

Computer Engineering graduate (University of Jaffna; degree requirements completed) with project experience building CI/CD pipelines with Jenkins and Argo CD (GitOps) and deploying to AWS EC2 and EKS on Ubuntu Linux. Automate deployments with Bash and Python and monitor services with Prometheus and Grafana. Completed a software engineering internship building backend systems in Node.js, Laravel and Python.

EDUCATION

University of Jaffna

2022 – 2026

BSc (Hons) in Computer Engineering (degree requirements completed; formal conferral pending)

- **Relevant Areas:** Cloud Computing, Distributed Systems, Microservices Architecture, Software Engineering

TECHNICAL SKILLS

- **Scripting & Languages:** Bash/Shell, Python, Java (OOP), JavaScript (Node.js), PHP, SQL
- **CI/CD & DevOps:** Jenkins, GitLab CI, GitHub Actions, GitHub Webhooks, Argo CD (GitOps), SonarQube, Maven, Git (GitHub/GitLab)
- **Cloud, Linux & Containers:** AWS (EC2, EKS, VPC, IAM, Route 53), Linux (Ubuntu), NGINX, SSL/HTTPS, Docker, Docker Compose, Kubernetes, Helm
- **Monitoring & Testing:** Prometheus, Grafana, Micrometer, Spring Boot Actuator, health checks, Resilience4J, Testcontainers, Selenium WebDriver, JUnit, Postman, TDD
- **Databases:** MySQL, PostgreSQL (raw SQL and ORM), MongoDB, Redis
- **Backend & Security:** Spring Boot, Spring Cloud, Express.js, Laravel, Flask, REST APIs, Microservices, OAuth 2.0, Keycloak, JWT, RBAC, Agile/Scrum

PROJECTS

Containerized CI/CD Pipeline for a Spring Boot Application | Solo Backend Developer

2025

<https://github.com/IsuruIndrajith/My-CICD-project.git>

Java, Spring Boot, Maven, Jenkins, GitLab CI, Docker, SonarQube, PostgreSQL, AWS EC2 (Ubuntu), NGINX, Bash

- Automated the build-to-deploy workflow for a Spring Boot application as a Continuous Integration and Continuous Delivery pipeline: Maven build, SonarQube static code analysis, Docker image build and automated deployment to AWS EC2, using Jenkins pipeline steps and Bash deployment scripts.
- Configured NGINX as a reverse proxy with SSL/HTTPS on an Ubuntu EC2 server, with a PostgreSQL database backing the application.

BudgetStack- Multi-user Flask Expense Tracker with Automated CI/CD

2026

<https://github.com/IsuruIndrajith/BudgetStack-Flask-application.git>

Python, Flask, MySQL, Docker, Docker Compose, Jenkins, GitHub Actions, GitHub Webhooks, AWS EC2 (Ubuntu), Bash

- Automated deployment of a containerized Flask/MySQL application to AWS EC2 on every push using GitHub Webhooks, GitHub Actions, Jenkins pipeline steps, Bash scripts and Docker Compose, removing manual deployment steps.
- Achieved reliable first-attempt deployments on a resource-limited Ubuntu EC2 instance by configuring swap, fixing MySQL host permissions and container networking, and adding retry and health-check logic to resolve startup race conditions.

Three-Tier Web Application on AWS EKS with GitOps

2026

<https://github.com/IsuruIndrajith/3-Tier-WebApp-K8s-GitOps.git>

AWS EKS, AWS VPC, Kubernetes, Docker, Argo CD, Helm, MongoDB, Route 53, Node.js, React

- Implemented GitOps-based continuous delivery with Argo CD, deploying a React, Node.js and MongoDB three-tier application to AWS EKS; provisioned the cluster and configured an AWS VPC with subnets.
- Deployed a stateful MongoDB workload with persistent volumes, and configured Kubernetes ingress with path-based routing, HTTPS termination and a custom domain through Route 53.

Distributed Microservices System with Event-Driven Architecture | Solo Backend Developer

2026

<https://github.com/IsuruIndrajith/Spring-Microservice-Monorepo.git>

Java 17, Spring Boot 3.5, Spring Cloud Gateway, Netflix Eureka, Apache Kafka, Keycloak, OAuth2, Resilience4J, MongoDB, MySQL, Docker, Prometheus, Grafana, Testcontainers, Maven

- Built 6 independently deployable Spring Boot services with Eureka service discovery, a reactive Spring Cloud Gateway secured with Keycloak/OAuth2, and event-driven communication over Apache Kafka.
- Added Prometheus and Grafana monitoring and Resilience4J Circuit Breaker, Retry and TimeLimiter patterns; wrote Testcontainers integration tests and containerized services with Google Jib and Docker Compose.

Automated Examination System | Team Leader & Backend Developer

2025

<https://github.com/IsuruIndrajith/Automated-Examination-System.git>

Java, Spring Boot, Spring Security, JWT, JPA/Hibernate, REST APIs, React.js, Selenium WebDriver

- Led an Agile/Scrum team building a role-based examination system (Java, Spring Boot, JWT, JPA/Hibernate, React.js); developed the REST backend and wrote Selenium WebDriver end-to-end tests.

PROFESSIONAL EXPERIENCE

DI 11 Soft (Pvt) Ltd

Rajagiriya, Sri Lanka

Software engineer intern

Oct 2025 – Aug 2026

- Diagnosed and fixed data integrity defects in a Python invoice automation system integrating an internal ERP with the Zoho Books REST API: corrected duplicate customer mapping validation, invoice filtering logic and failed-invoice error reporting.
- Engineered REST APIs in Node.js/Express for a multi-tenant Inventory Management System (versioned v1/v2 layers, 20+ modules, granular role- and user-level permissions) and an ERP Inventory system with TensorFlow.js sales forecasting and at-risk stock alerts.
- Engineered a Wholesale Inventory backend (Laravel 12, PHP 8.2) with a RESTful API for B2B/B2C workflows, RBAC, audit logging and 47+ Eloquent models.
- Integrated Google Gemini AI into an HR Management System backend to automate a daily employee flight-risk scoring workflow from overtime and leave patterns.

NEXT ORA GLOBAL

Remote, Part-time

Software engineer intern

Dec 2025 – Aug 2026

- Built a Python web-scraping platform that automates extracting and backtesting Forex trading signals from 10+ Telegram channels.

CERTIFICATIONS & ACHIEVEMENTS

- IBM Introduction to DevOps, Coursera, Sep 2026 | DevOps Foundations: Infrastructure as Code, LinkedIn Learning, Mar 2026
- IEEE Xtreme 18.0: Local Rank 116, Global Rank 1,248 (Dec 2024) | Yarl Xtreme: Winner (Oct 2024) | MoraXtreme 9.0: Local Rank 61 (Nov 2024)

VOLUNTEERING

IEEE ComSoc Student Branch Chapter, University of Jaffna

2024 – 2026

Co-organized the ComSoc Summer School 2025 technical session series.

Sasnaka Sansada Foundation

2021 – 2022

authored 25+ educational resources for the foundation's online learning platform, receiving 90% positive user feedback.
