

ISURU EDIRISINGHE

Software Engineering Candidate

Colombo, Sri Lanka | **Phone:** (+94) 705600250 | **Email:** isuruindrajith680@gmail.com | **LinkedIn:** www.linkedin.com/in/isuru-edirisinghe | **Web:** <https://my-portfolio.vercel.app> | **GitHub:** github.com/IsuruIndrajith

PROFESSIONAL SUMMARY

Software Engineering candidate with a BSc (Hons) in Computer Engineering from the University of Jaffna, with degree requirements completed and 1 year of software engineering internship experience. Developed REST APIs and enterprise applications using Node.js, Express.js and Laravel, with project experience in Java, Spring Boot, microservices, secure APIs, distributed systems, Docker, CI/CD and AWS.

EDUCATION

University of Jaffna

2022 – 2026

BSc (Hons) in Computer Engineering (degree requirements completed; formal conferral pending)

- **Relevant Areas:** Microservices Architecture, Distributed Systems, Cloud Computing, Software Engineering

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, PHP, SQL
- **Backend:** Spring Boot, Spring Security, Spring Data JPA/Hibernate, Spring Cloud, Express.js, Laravel, REST APIs, WebSocket/STOMP
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Architecture & Security:** Microservices, Event-Driven Architecture, OAuth2, JWT, Keycloak, RBAC, Resilience4j, Distributed Locking, Idempotency
- **Cloud & DevOps:** AWS EC2, AWS EKS, VPC, Route 53, Docker, Kubernetes, Helm, Argo CD, GitOps, Jenkins, GitLab CI/CD, SonarQube
- **Testing & Observability:** JUnit, Testcontainers, Selenium, Prometheus, Grafana, Micrometer
- **Frontend & Tools:** React, Git, Maven, Postman, TensorFlow.js, Agile/Scrum

PROFESSIONAL EXPERIENCE

DI 11 Soft (Pvt) Ltd

Rajagiriya, Sri Lanka

Software engineer intern

Oct 2025 – Sep 2026

- Built a multi-tenant inventory REST API with versioned (v1/v2) layers across 20+ modules, including stock, billing and real-time dashboards, secured by role- and user-level permissions.
- Developed a Laravel 12/PHP 8.2 REST API for a wholesale inventory system covering B2B/B2C orders, invoicing, warranty claims and stock, with RBAC and audit logging across 47+ Eloquent models.
- Developed REST APIs for an ERP-based Inventory Management System using Node.js and Express.js, covering sales analytics, inventory tracking and role-based access control (RBAC).
- Integrated TensorFlow.js regression models to deliver machine learning-driven sales forecasting, demand heatmaps and at-risk stock alerts.
- Debugged and resolved data-integrity issues in a Python invoice-automation pipeline integrating an internal ERP with the Zoho Books REST API, including duplicate customer mapping, invoice filtering and failed-invoice error reporting.
- Participated in Git-based code reviews and collaborative development within Agile/Scrum workflows, reviewing changes and addressing implementation issue

Next Ora Global

Remote | Part-time

Software engineer intern

Oct 2025 – Aug 2026

- Built a Python scraping platform to extract Forex trading signals from 10+ Telegram channels and backtest their performance.

PROJECTS

Distributed Microservices System with Event-Driven Architecture | Solo Backend Developer

2026

<https://github.com/IsuruIndrajith/Spring-Microservice-Monorepo.git>

Java 17, Spring Boot 3.5, Spring Cloud (Eureka, Gateway), Resilience4j, Apache Kafka, Keycloak/OAuth2, MongoDB, MySQL, Docker, Prometheus, Grafana, Testcontainers, Maven

- Built 6 independently deployable Spring Boot microservices with Netflix Eureka service discovery and a reactive API Gateway (Spring Cloud Gateway/WebFlux).
- Secured the gateway with Keycloak OAuth2 and applied Resilience4j Circuit Breaker, Retry and TimeLimiter patterns.
- Implemented event-driven service communication with Apache Kafka, added observability with Prometheus and Grafana, and containerized services with Google Jib and Docker Compose.

BidSafe- Real-Time Bidding Platform with Concurrency-Safe Bids | Solo Backend Developer

2026

<https://github.com/IsuruIndrajith/BidSafe-Real-time-bidding-platform-with-concurrency-safe-bids>

Java 17, Spring Boot 4.1.1, Spring Security, Spring Data JPA/Hibernate, WebSocket (STOMP), Redis, MySQL 8.0, Bucket4j, Micrometer, Prometheus, Grafana, Docker, JUnit, Maven

- Built a bidding REST API combining pessimistic locking, JPA optimistic locking (@Version) and Redis distributed locking to prevent race conditions under concurrent bid load.
- Implemented Idempotency-Key deduplication for exactly-once bid processing and Bucket4j token-bucket rate limiting.
- Secured the API with Spring Security and JWT authentication, and broadcast live bids to clients over WebSocket/STOMP.
- Added metrics with Micrometer, Prometheus and Grafana, containerized the service with Docker, and validated behavior with JUnit integration tests.

Cloud-Native CI/CD Pipeline for a Spring Boot Application | Solo Backend Developer

2025

<https://github.com/IsuruIndrajith/My-CICD-project.git>

Jenkins, GitLab, Maven, SonarQube, Docker, AWS EC2, NGINX, PostgreSQL

- Built a Jenkins/GitLab CI/CD pipeline automating Maven builds, SonarQube code-quality analysis and Docker containerization of a Spring Boot application.
- Automated deployment to AWS EC2 with NGINX and SSL.

Three-Tier Web Application on AWS EKS with GitOps

2026

<https://github.com/IsuruIndrajith/3-Tier-WebApp-K8s-GitOps.git>

AWS EKS, AWS VPC, Docker, Kubernetes, Argo CD, MongoDB, Helm, Route 53, Node.js

- Provisioned an AWS EKS cluster and deployed a three-tier web application (React, Node.js, MongoDB) as Docker containers on Kubernetes, inside an AWS VPC configured with subnets.
- Implemented GitOps-driven continuous delivery with Argo CD and deployed MongoDB as a stateful workload with persistent volumes.
- Configured ingress with path-based routing, HTTPS termination and a custom domain through Route 53.

ACHIEVEMENTS & CERTIFICATIONS

Certifications : DevOps Foundations: Infrastructure as Code, LinkedIn Learning (Mar 2026) | Introduction to DevOps, IBM via Coursera (Sep 2026)

Competitions : IEEE Xtreme 18.0: Local Rank 116, Global Rank 1,248 (Oct 2024) | Yarl Xtreme: Winner (Oct 2024) | MoraXtreme 9.0: Local Rank 61 (Nov 2024)

VOLUNTEERING

IEEE ComSoc Student Branch Chapter, University of Jaffna

2024 – 2026

Co-organized the ComSoc Summer School 2025 technical session series.

Sasnaka Sansada Foundation

2021 – 2022

authored 25+ educational resources for the foundation's online learning platform, receiving 90% positive user feedback.
